NOTICE

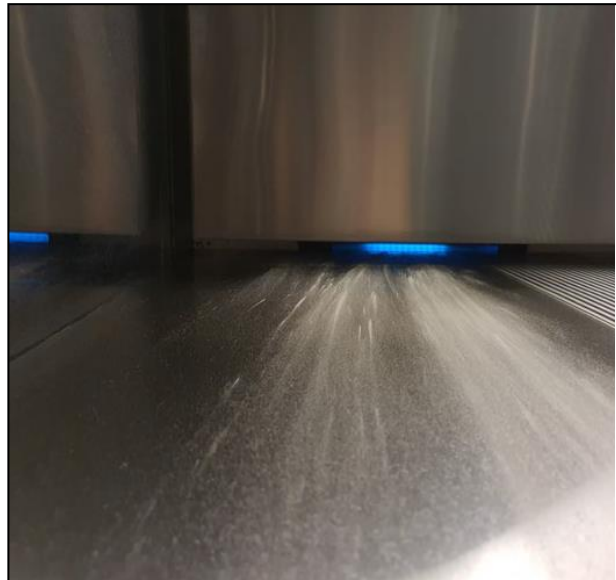

Ref No : QS/MC/NOTICE/DS/2021/097
Date : 22nd November 2021
To : All Owners / Tenants
From : The Management, Q Sentral
Subject : **COVID – 19 CONTINUOUS PREVENTIVE MEASURES**

Dear Sir / Madam,

In accordance with the National Recovery Plan, Q Sentral Management Corporation has always vigilant about the safety of the occupants. Therefore, we are pleased to inform the completion of the UV light installation for our Double Deck Lift Cabins & Escalators in the building.

Lift Cabin

The UV light reduces and eliminates harmful bacteria and viruses before air is drawn into the lift cabin. The surface of the lift cabin and fan chassis is consistently disinfected by the UV light which further eliminate unpleasant odour. Our test and results have proven the air quality inside the lift cabin is improved by 91%.

PERBADANAN PENGURUSAN Q SENTRAL

Escalators

The surface of handrail belt is consistently being disinfected by UV light at all times of operation, reducing and preventing the spread of viruses and bacteria.

Safety concern

UV light is mounted and functions on top of the lift cabins and inside of the escalators; preventing a direct contact that can cause severe effects to the human body.

We will continue to undertake the necessary preventive and precautionary measures to ensure the safety of all occupants as the safety and comfort of our occupants has always been our priority. We also would like to urge all occupants to cooperate with us in adhering to the routine SOPs by the government. Should you have further inquiry, kindly contact the Management Office at 03 2730 2041 or email to helpdesk@qsentralkl.com. Your cooperation is highly appreciated.

Thank you.

The Management
